effect**

growing ecogifts with seeds

Let's save GREENPLANET™ together

Our products contain pine seeds
- the tree most often used in our climate zone for the production of paper and wooden articles

Plant your honey flowers and help the bees live on our planet

Eco calculator

How is honey made?

1 one adult pine „produces“ oxygen necessary for the lives of three people

1 one tree produces as much oxygen a year as a person consumes in 2 years of life

1 one hectare of forest absorbs as much CO₂ as 1 hour as 200 people release it

Types of **ecopaper**:

01 **FSC® PAPER**

It's a product of responsible forest management, and it means that the trees, from which it was created, were obtained from legal sources, without violating human rights and nature. FSC is the only certification system supported by major ecological non-governmental organizations.

The bleaching process used to whiten paper carried out without the use of chlorine gas. It is uncoated, opaque and has excellent parameters for printing.

02 **100% RECYCLED PAPER**

Is made out of 100% waste paper scrap from FSC certified paper. It is uncoated and opaque. Has a matt surface and smooth texture, is characterized by high print quality.

The production of 1 ton of recycled paper saves:

03 **GRASS PAPER**

As the name suggests, grass paper is paper made from grass fibers. Manufactured with the highest care for the environment, it contains up to 40% grass fibers, and the rest is complemented by virgin fibers. The grass fiber comes from the areas of ecological compensation. It is 100% organic and compostable.

Certificates and approvals:
FSC / ISEGA / Compostability certificate

04 **APPLE PAPER**

Apple paper is made of pure cellulose enriched with waste from apple processing. Apple peel and core are used for the production of the raw material from which the paper is made. Apple paper contains up to 15% of cellulose obtained from apple waste and up to 30% of vegetable fibers from post-consumer waste recycling.

Apple Paper is made using 100% green energy.

05 **BASIC CHAMOIS PAPER**

The paper is characterized by a smooth, elegantly finished surface and an eye-pleasing, light ivory color. Provides publications with a prestigious appearance. Its undoubted advantage is the affordable price. The paper is FSC certified.

- height – 145 mm
- width – 78 mm
- thickness – 4 mm

GF Personalized eco-friendly offer folder

GROWFOLDER

Ecological folders are made of stiff cardboard paper. You can choose from 100% recycled cardboard or kraft paper. After use, these folders can be recycled.

There are also wings inside the offer folders made of ecological paper. They fold inside the folder, protecting documents against slipping, creasing or dirt. One of them has an incision where you can put a company business card.

Eco-friendly folder:

- **dimensions:** 215 × 300 mm (standard spine)
- **printing:** one-sided
- **color:** 2/0
- **project:** ready or individual
- **This gadget can be marked with** your graphics/logo.
- **paper:** eco kraft or recycled
- **closure:** elastic band
- **seeds:** placed on an elastic band in an MDF box

GBC Personalized eco-friendly business card

GROWBUSINESS CARD

Eco business cards are printed on special, ecological, recycled kraft paper. The paper of business cards has a light brown shade, the thickness of the paper is 250 g. We print on ecological business cards using a modern digital method.

The Eco business cards we offer stand out from other offers, because in addition to the basic CMYK colors for printing, we also use white printing. Each business card on the obverse contains a box of pine seeds. There is a planting instruction on the back of the card. It is an ecological alternative to a regular business card.

We can print business cards in dimensions of 85 × 50 mm and 50 × 85 mm.

GL Paper lanyard with seeds

GROWLANYARDS

DPN Pine tree seedling in paper pot

PINE TREE SEEDLING

availability: all year

YOU SHOULD KNOW:

- pine is a fast-growing tree, reaches up to 40 m in height
- it is a basic source of wooden furniture and paper pulp
- resistant to salinity and pollution, therefore it is suitable for planting in cities and roads sides
- pile root system is perfect for strengthening dunes and slopes
- shapes well and tolerates pruning

HOW PAPER IS MADE?

1 TREE = 50 KG OF PAPER

- 1 first you need to prepare paper pulp, i.e. crush the raw material, generally wood
- 2 paper pulp is mixed with water, glue, inks and other additives, then fulling
- 3 combine the wet fibers and compress into webs or sheets
- 4 after drying and cooling, the paper is ready for use

plant seedling in accordance with applicable laws place

DOXT Oxytree seedling in paper pot

OXYTREE SEEDLING

availability:
from mid-May to October

plant seedling in accordance with applicable laws place

YOU SHOULD KNOW:

- oxytree is extremely fast growing – six years after planting it reaches 16 m height and 35 cm in diameter
- well adapted to different climatic conditions and soil
- it needs huge amounts of carbon dioxide for the rapid growth and produces oxygen in photosynthesis
- grow again after cutting – produces 4 times more wood than other native species in 20 years
- is widely used in furniture industry – wardrobes, tables, chairs
- thanks to lightness and water resistance it has been appreciated by producers of yachts, ships and surfboards

Oxytree plants protect the environment and significantly improve air quality

OXYTree GREEN PLANET planting requirements

- loose, well-drained soil
- soil pH in the range of 5.5–8.9
- ground water below 2 m
- non-flooded and non-wetland areas

SET CONTAINS:

1

OXYTREE SEEDLING

- placed in paper pot (dimensions: 100 × 95 mm)

NGP Narcissus bulbs in personalized pot

NARCISSUS

Yellow miniature narcissus in a paper pot. A beautiful plant in a pot with a diameter of 9.5 cm. It is an onion plant from the Amaryllidaceae family. It is a hybrid belonging to the miniature narcissus. Its distinctive feature is that it grows up to 20 cm in height. Usually it also develops three yellow flowers per stem.

CULTIVATION AND CARE:

- likes sunny or slightly shaded places
- permeable soil with a high content of humus
- moderate watering
- flowering date: February–April
- bulb distance when planting: about 10 cm
- after purchase, plants should be transplanted into larger pots or into the ground

HGP Hyacinth bulbs in personalized pot

HYACINTH

packaging dimensions:
410 × 180 × 170 mm

HGP.01 White

Hyacinth (*Hyacinthus*) is a type of plant from the asparagus family. Hyacinths can be grown in garden beds, in boxes on balconies and terraces, as well as grown in a pot at home.

The bell-shaped flowers of hyacinths are gathered in clusters. They give off a characteristic intoxicating scent. The flowering of hyacinths begins in February.

CULTIVATION AND CARE:

- warm and sunny position, possibly slightly shaded
- protect them from the wind
- the warmer they are, the faster they will bloom
- permeable, fertile soil, preferably humus, with a pH close to neutral
- regular watering

AIR PURIFYING PLANTS

available: all year

BH Ivy seedling in paper pot

HEADER IVY

packaging dimension:
410 × 180 × 170 mm

Ivy is a species of evergreen climber belonging to the araliaceae family.

CULTIVATION AND CARE:

- fertile peat substrate with a slightly acidic reaction
- high air and ground humidity
- prefers partial shade or complete shading

DFC Dracaena seedling in paper pot

DRACAENA

CARDBOARD PACKAGING

for all potted plants +
print with your logo

Dracaena is one of the most popular plants, it is very easy to grow, and its interesting and modern look makes it suitable for both modern and office interiors.

CULTIVATION AND CARE:

- bright position, but does not like direct sunlight (its leaves turn pale and burn)
- do not water until the soil is slightly dry
- transplanting every few years
- does not like excess water in the substrate

HGP Parlor palm seedling in paper pot

PARLOR PALM

packaging dimension:
410 × 180 × 170 mm

Parlor palm (*Chamaedorea elegans*) is a plant from the areaceae family that is found in nature in tropical forests.

CULTIVATION AND CARE:

- semi-shaded position
- high air humidity and constantly moist substrate
- do not expose to direct sunlight
- fertile, humus substrate with a lot of peat

PLANT YOUR HONEY PLANTS AND HELP THE BEES LIVE ON OUR PLANET

1 **one** one average bee will produce only 1/12 teaspoon of honey in a lifetime

1 **one** one honey bee pollinates 50 to 100 flowers during one trip

Bees as pollinators are extremely important to our ecosystem. Research says that more than 1/3 of what we put on our plates each day depends on the pollination process. This means that the extinction of the bees would lead to a collapse in food production and an ecological disaster.

Unfortunately, such a vision is possible because there are fewer and fewer of these valuable insects. They are killed, among others, by pesticides sprayed on fields, the disappearance of wildlife, and climate change.

However, each of us can do something for our little buzzing friends, and thus for the world – plant honey plants on your balcony, in your garden, or in the field.

GH Personalized honey with honey flowers seeds

GROWHONEY

- personalized label with logo
- material: honey, glass jar,
- adhesive sticker
- printing: logo / own design
- genus: multiflorous

GBM Gardener ecobomb with honey flowers seeds

GROWBOMB

A unique composition of a dozen undemanding, colorfully blooming wild flowers and herbs, annuals and perennials enclosed in an easy-to-use, diameter ball about 24 mm made of bio-humus and a clay binder. Just wet the surface of the ball with water, then choose the target where you want new life to bloom and throw.

The packaging contains 1 piece of bio-ball with sowing instructions.

colors:

a mixture of poppies - Siberian poppies, field

cornflower, common echium, Moldovan beekeeper, black cumin

basil, marjoram, thyme, dill, parsley

pyrethrum, field chamomile, rudbeckia My Joy, chamomile

GC Confetti with honey flowers

GROWCONFETTI

One of a kind confetti made of colored paper with flower seeds in its composition.

2 cm discs in 5 traditional colors.

After scattering them, the confetti will grow into field, honey flowers.

A perfect addition to wedding, New Year's Eve, birthday and other occasional celebrations and for everyone, for whom it is important to care for the natural environment. By purchasing this product, you contribute to increasing the biodiversity of the natural environment, you save the bees and take care of your own surroundings.

What to do with confetti?

Scatter confetti at the desired location. Water every day until the first plants appear. Then, depending on the prevailing weather conditions. After some time, the paper will unfold and the seeds will grow into colorful, honey flowers.

date of sowing: April–May
flowering time: June–September

Composition:

Nemesia
Lobularia maritima
Phlox paniculata
Brachycome iberidifolia

GROWHOTEL & RESTAURANT for insects

A wooden bug hotel will not only be a fashionable and decorative addition to a garden or plot, but in the designed structure of pipes and holes, it will become a year-round shelter for useful garden insects, as well as a place to lay eggs.

The hotel looks aesthetically, it is made with attention to detail, it will quickly attract red mason bees and other useful insects. Shipped assembled, does not require self-assembly. It can easily be placed as a free-standing or suspended from a tree. Placing houses surrounded by fruit trees favors their pollination by the pollinators inhabiting them.

SET CONTAINS:

1

BUG HOTEL

- eco-friendly, made of wood
- dimensions: 260 × 290 × 85 mm
- engraved logo
- for use all year round

2

PAPER POT - RESTAURANT
